1. Introduction

The NHS Personalised Care System is a comprehensive healthcare management platform designed to implement the NHS England Comprehensive Model for Personalised Care. This system helps patients and healthcare providers track health goals, monitor outcomes, and leverage AI-powered insights for better health management.

- Patient Management with NHS numbers
- Personalised Care Plans
- Goal Tracking with progress indicators
- Outcome Measurement against targets
- Patient Activation Measure (PAM) scoring
- AI-powered risk prediction and recommendations
- Clinical Notes with sentiment analysis
- Offline-first Progressive Web App
- Real-time updates via WebSocket

2. Getting Started

2.1 Accessing the Application

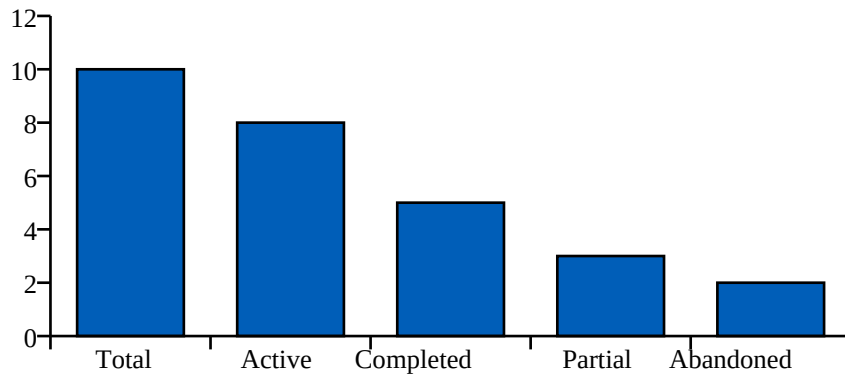

1. Open your web browser
2. Navigate to: <https://nhs-personalised-care.vercel.app>
3. The dashboard will load automatically
4. Use the sidebar to navigate between sections

2.2 Demo Accounts

NHS Number	Name	Role
NHS123456	Sarah Johnson	Patient
NHS789012	James Smith	Patient
NHS345678	Aisha Patel	Patient

3. Dashboard Overview

The dashboard provides a comprehensive overview of your health status and progress.

Patient Activation Measure (PAM)

Shows the patient's activation level and score

Statistics Cards

Displays goals, completion rate, outcomes, and decisions

Risk Assessment

Shows current risk level and factors

Recent Activity

Lists recent actions and updates

4. Patient Management

4.1 Adding a New Patient

Click '+ New Patient' button

Fill in NHS Number, Name, Date of Birth, and Gender

Click 'Add Patient' to save

4.2 Switching Patients

Navigate to the 'Patients' tab

Click 'Select' next to the desired patient

The dashboard will update with their data

5. Goal Management

5.1 Creating a Goal

Navigate to the 'Goals' tab

Click '+ New Goal'

Enter a description (e.g., 'Walk 30 minutes daily')

Select a domain (Physical Health, Mental Health, etc.)

Add steps to break down the goal

Set a target date

Click 'Create Goal'

5.2 Goal Status Types

- **Planned:** Goal created but not started
- **In Progress:** Actively working on the goal
- **Achieved:** Successfully completed
- **Partially Achieved:** Made progress but not complete
- **Abandoned:** No longer pursuing

6. Outcome Tracking

6.1 Recording an Outcome

- Navigate to the 'Outcomes' tab
- Click '+ Record Outcome'
- Enter the metric name (e.g., 'Blood Pressure')
- Select the domain
- Enter the current value
- Optionally enter a target value
- Click 'Record Outcome'

6.2 Understanding Outcomes

Outcomes show your progress toward health targets. The system automatically tracks whether you've achieved your target value.

7. AI Insights

7.1 What AI Insights Provide

Risk Assessment: Predicts your health risk level based on data

PAM Prediction: Forecasts future activation scores

Recommendations: Suggests actions to improve health

Domain Scores: Shows performance in different health areas

7.2 Generating Insights

Navigate to the 'Insights' tab

Click 'Refresh' to generate new insights

Review the risk assessment and recommendations

Use the insights to inform health decisions

8. Clinical Notes

8.1 Adding a Clinical Note

Navigate to the 'Notes' tab

Click '+ Add Note'

Enter the clinical note text

Enter the author name

Click 'Save Note'

8.2 Sentiment Analysis

The system automatically analyzes the sentiment of clinical notes:

- ■ Positive: Indicates improvement or positive outlook
- ■ Neutral: Objective clinical observation
- ■ Negative: Indicates concerns or decline

9. Settings & Configuration

9.1 Changing Patients

Go to the 'Settings' tab

Select a patient from the dropdown

The dashboard will update with their data

9.2 Data Management

Export Data: Downloads all data as a JSON file

Clear Data: Deletes all data for the current patient

10. Troubleshooting

Dashboard not loading

Solution: Check internet connection or refresh the page

Data not showing

Solution: Ensure you're logged in and have selected a patient

API errors

Solution: Check the Vercel logs for details

PWA not installing

Solution: Use HTTPS or localhost for installation

11. API Reference

Method	Endpoint	Description
GET	/api/health	Health check
GET	/api/person/{nhs}	Get patient details
POST	/api/person	Create new patient
GET	/api/goals/{id}	Get patient goals
POST	/api/goal	Create new goal
GET	/api/outcomes/{id}	Get patient outcomes
POST	/api/outcome	Record an outcome
GET	/api/pam/{id}	Get PAM scores
POST	/api/pam	Record PAM score
GET	/api/notes/{id}	Get clinical notes
POST	/api/note	Add clinical note
GET	/api/insights/{id}	Get AI insights
GET	/api/population	Get population statistics
